Why choose Amtico Form?

The idea behind Amtico Form is simple. It looks like natural wood and stone while still performing effortlessly as LVT. It offers specifiers charm, character, and the tactile beauty of natural materials. Crafted with the hard-wearing quality and pure usability you've come to expect from our products, to elevate and enhance any environment.

Bring the outside in

Biophilic design is a guiding force for commercial spaces, with the built environment drawing us ever closer to nature. Form is created in the spirit of this movement – harnessing the interplay of colour, diffused light and deeply tactile surface textures.

Natural aesthetics

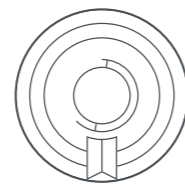

By studying the intricacies of natural wood and stone, interpreting the patterns formed by grain and weathering, our in-house designers have crafted a collection that is both natural in colour and texture.

Capture a feeling, change the mood

With Form, you can connect people to the grain of wood, the solidity of stone, the subtle shift of surface textures as light changes throughout the day – bringing the outside in and improving the wellbeing of people within the space.*

* Tsunetsugu, Y., Y. miyazaki, & H. Sato (2007). Physiological effects in Humans Induced by the visual Stimulation of Room Interiors with Different Wood Quantities. Journal of Wood Science, 53 (1), 11-16.

Certified for quality and wellbeing

With its hard-wearing 0.7 mm wear layer, this premium LVT is certified for use in education, healthcare, homes and offices – meeting VOC requirements for wellbeing and air quality across the globe.

¹ Acoustic backing available on all Form products except for Basket Weave, Barrel Oak, Pavestone and Hex designs.

Acoustic Backing¹

Accentuating architecture

Our experience of an environment is highly influenced by the use of colours and textures within it. Through Form, we offer a practical way to harness the calming power of natural materials for hard-working commercial spaces.

Multi-functional spaces

It's the new normal for commercial spaces to serve multiple functions. As a collection, Form can adapt to suit any space – with the combination of Wood and Stone creating a natural sense of flow, of movement and distinct zones.

Gotland Oak – Stripwood & Basket Weave FP101

Creating mood

Amtico Form can contribute to the overall sensory experience of a room. As well as refined colours for visual stimulus, the subtle surface textures and the warmth of LVT underfoot also appeal strongly to the sense of touch.

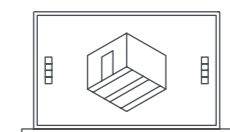

Dimmet Oak – Stripwood

Features and focal points

Combining the elegant, handcrafted nature of Form with a modern mix of laying patterns, Form can be both a highly-functional, hard-wearing floor and the focal point of your space.

Mineral – Uniform Block & Concrete Pale stripping

Projects: Novotel – Noisy Le Grand

The lobby space of this four star Paris hotel is its beating heart – a place where guests are greeted, where friends meet, enjoy a drink, and find time to work. A place of passage, a place of exchange, with a distinct atmosphere.

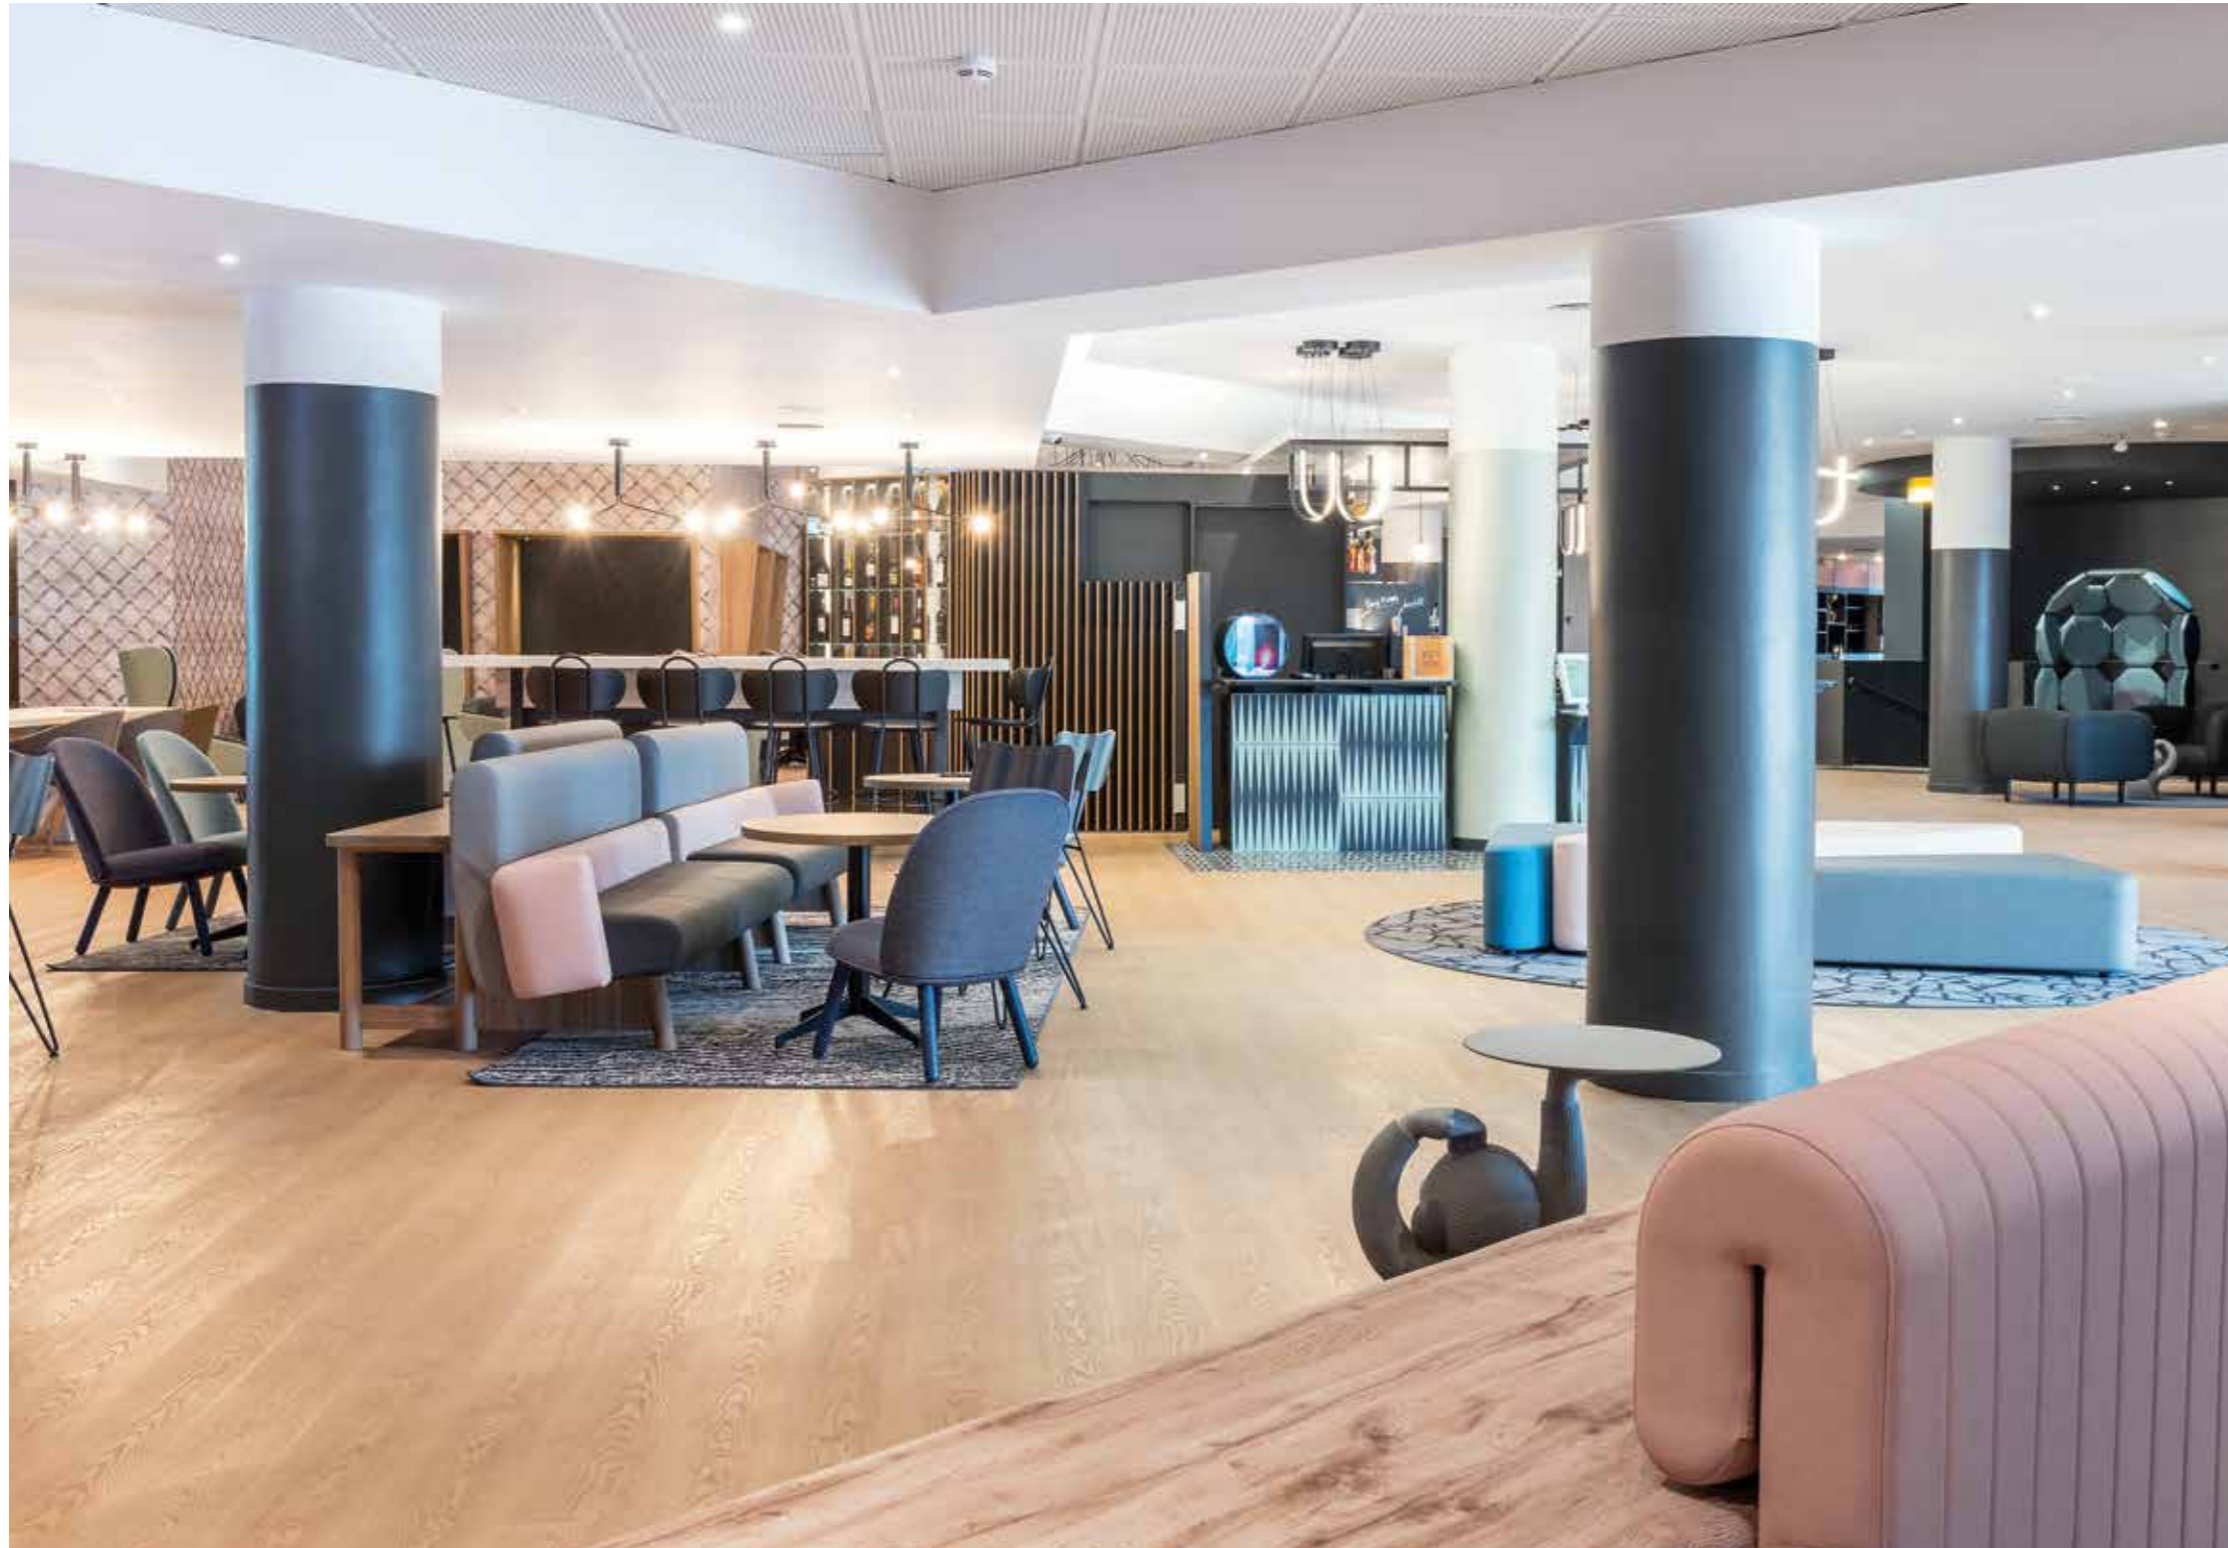

Technically, a heavy traffic floor was needed, however the designer had a clear vision – aesthetically the floor had to blend into the soft pastels of the decor, supporting without intruding. Barrel Oak Rye's knot-free, gently repetitive style matched perfectly with this ambition.

Location: Paris, France
Sector: Hospitality
Products & Laying Patterns: Barrel Oak Rye laid in Stripwood

We are satisfied with this flooring from an aesthetic point of view, in particular the luminous tone it gives off, but also regarding its qualitative and noble appearance, its robustness and finally its ease of daily maintenance.

William Ziegler, Director of Novotel Noisy le Grand

1300 m²
LVT Footprint

Projects: Lerch Day Care Centre

The design of this modern, adult care space focused on creating a sense of warmth and positivity for the 20 daycare guests, residents and office staff.

Barrel Oak Dune compliments the light-filled rooms with its sun-drenched tones, echoing the natural warmth. Barrel Oak Smoke's grey and cream tones and soft flowing wood grain helped to create a softer, Nordic-inspired look communal and administrative spaces.

Location: Schwendi, Germany
Sector: Care

Products & Laying Patterns: Barrel Oak Smoke,
Barrel Oak Dune laid in Stripwood
Photography: ©Martin Duckek

The design and format selection was simply convincing and the installation went really well.

Built to perform

Amtico Form's 0.7 mm wear layer makes it suitable for heavy commercial and even industrial classification environments. It offers all the charm and character of natural materials, while being much lighter to handle on site and easier to clean and maintain in high-traffic environments.

Amtico Form is made using our world-leading Multiple Performance System – giving users underfoot comfort, unrivalled durability and a long lasting appearance.

2.5 mm total thickness

0.7 mm wear layer

12YR COMMERCIAL WARRANTY

ANTIMICROBIAL

Through 2021 we'll be rolling out our brand new antimicrobial technology across the Form collection. This ionic silver additive has been proven to reduce bacteria¹ present on a floor by more than 99% over 24 hours.

Phthalate free

A low emission product

BREEAM rated

Made with 23% recycled content

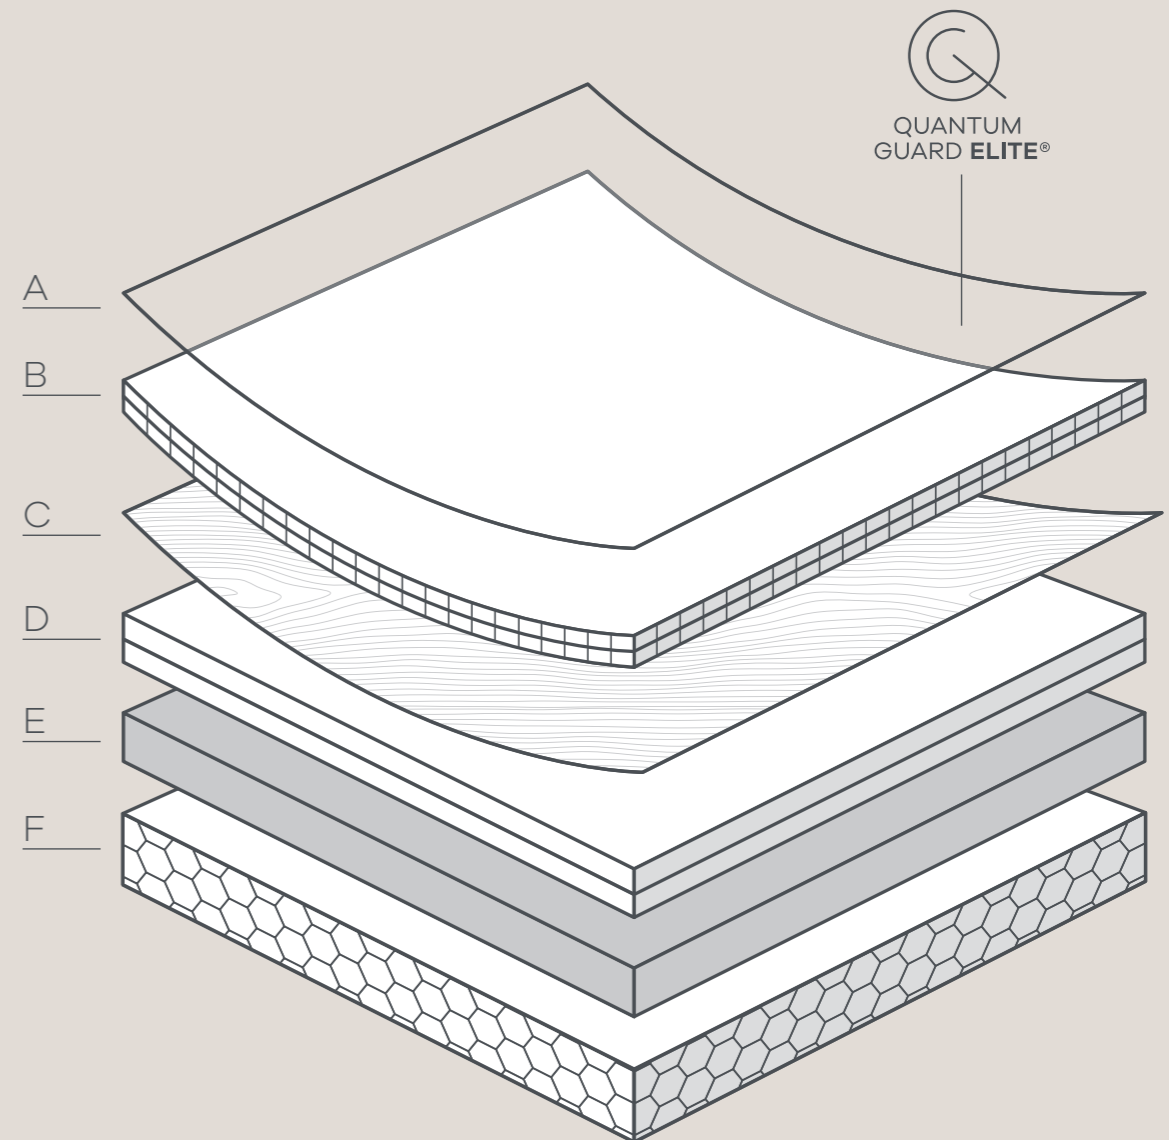

Sound reduction²

¹ Tested with E.coli and MRSA in laboratory test conditions using ISO22196 method.

² Sound reduction is achieved with products that feature Acoustic Backing.

³ Form Natural Wood Grain Emboss designs (Barrel Oak) are produced with a standard urethane coating.

Multiple Performance System

A. Quantum Guard Elite³

Amtico's patented urethane formula provides superior durability and resistance against abrasions and stains. The reinforced low gloss finish is highly realistic.

B. High density 0.7 mm wear layer

Toughened upper layer, giving excellent impact resistance and high clarity, with unique realistic embosses.

C. Design layer

Carefully crafted print films create the distinctive Amtico Wood and Stone product designs.

D. Core layer

Contains up to 32% recycled pre-consumer content.

E. Backing layer

The foundation of the product which provides long lasting stability. Contains up to 30% recycled pre-consumer content.

F. Acoustic backing layer (optional)

Reduces the impact sound by up to 19dB and provides an extra level of comfort underfoot.

Surface Treatment			Urethane	Quantum Guard Elite

For Form Acoustic please refer to the Form Acoustic technical specification on amtico.com
* for safety flooring with long-term retention of slip resistance refer to Amtico Signature 36+ and Amtico Spacia 36+.

Installation

The Form Collection has been designed for straightforward installation. To achieve the best application of Form follow these floor preparation and installation guidelines.

Intended Use

- Amtico Form products are recommended for use over properly prepared concrete, suspended wood, metal and other suitable substrates.
- Do not install Amtico Form products until the subfloor is prepared and the work of all other trades is complete.
- Amtico Form products can be used with radiant under-floor heating systems, but note that the surface temperature of the subfloor must not exceed 27°C (81°F).
- Amtico Form products are not intended for outside use.

Material Receiving, Handling & Storage

- Ensure materials delivered are the correct style, colour, shade and quantity; check tiles for visual defects.
- Report discrepancies immediately.

Jobsite Testing & Subfloor Preparation

- The building must be sealed with stable environmental conditions.
- Subfloor must be clean (free of dirt, old adhesives, paint, grease, wax or other contaminants that may stain or prevent adhesion), smooth, flat, sound, fit for purpose and free of movement and excess moisture.
- Test concrete for moisture content (country specific) or relative humidity in accordance with national regulations.
- Readings above the maximum permitted require the use of a surface damp proof membrane or adequate time for the floor to dry to an acceptable standard. Record test results and corrective action(s). Documentation is required for processing claims.
- Bring the subfloor to an acceptable condition using appropriate smoothing and levelling compounds. For wood subfloors use approved underlayment panels. Install surface preparation materials according to the manufacturers' instructions and ensure a smooth surface to prevent any irregularities or roughness from telegraphing through the new flooring.

Installation Procedures

- Inspect each tile for visual defects before installing.
- Installation of flooring implies acceptance of materials.
- Acclimatise Amtico Form products, adhesive and subfloor to a stable condition between 18°C-27°C (64°F-81°F) for a minimum of 24 hours before, during and after installation. For best results and in particular when extreme temperature conditions exist, increase the acclimatisation to a minimum of 48 hours.
- Apply recommended Amtico adhesive according to label instructions. Adhesive selection should be appropriate to site conditions – see adhesive labels for more detailed information. Amtico will not be held responsible for any installation complaints if a non-recommended adhesive is used.
- The floor must be rolled using a 45 kg three-section roller in both directions.
- The finished floor should be protected from point loads and heavy traffic for 24 hours after installation and should not be washed for 48 hours.

Routine Maintenance

- Daily sweep or dust mop the floor and clean up all spills immediately.
- Perform damp mopping or machine cleaning (<450 rpm) as necessary. For routine everyday cleaning, use Amtico Maintainer or equivalent.
- When machine cleaning, use a 3M red pad or equivalent.
- Avoid cleaners that contain abrasives or solvents that may permanently damage the floor.

Periodic Maintenance

- Use stripper to remove ground in-dirt and old or worn coats of dressing.
- Dressings can be applied if desired or as necessary. Follow the instructions for proper usage and application.

Caution

When kept clean and dry, Amtico Form products have excellent slip-resistant properties. However, in common with other smooth floor coverings, water, other liquids, grease and other contaminants on the surface of the floor can make them slippery.

Visit amtico.com for more information on our product range, inspiring ideas, maintenance and installation advice. Every effort is made to achieve accurate reproduction of products in this brochure, however printing limitations can be misleading. Selection of products should be made from actual samples. Samples are small pieces cut from standard tiles. They give only a general indication of the design. Tone and shading can vary slightly from batch to batch and it is not possible to guarantee that the sample will exactly match the material supplied. The policy of the Company is one of continuous development and improvement and the right is reserved to add or delete from the range or change patterns without prior notification. All metric sizes are rounded. All products are manufactured in line with EN ISO 10582 and EN1307. Brochure correct at the time of printing.
